

Snake River Headwaters Watershed Group (SRHWG)

INTRODUCTION

SRHWG is a collaborative special-interest group that was established to share information and to provide education about the issues surrounding the Snake River Headwaters Watershed.

The purpose of the group is to bring a broad coalition of partners together to ensure a resilient and healthy Snake River Headwaters ecosystem with clean and ample water to meet the needs of current and future generations.

The group is in the early stages of development since its inception in late 2023 but has elected a steering committee made up of agency and local representatives.
